WORK EXPERIENCE

St. Tammany Parish Assessor's Office (February 2013 – Present)

Covington, Louisiana

Job Title: GIS Analyst, GIS Coordinator

Supervisor: Ian Beer, Information Technology Director

- Produce geographic data to update and maintain the Assessor's Geographic Information System (GIS).
- Quality control GIS data by performing regular QC checks.
- Produce and update the Guidance Manual for the Assessor's GIS Department, which is a living document that dictates data standards and explains production procedures.
- Manage a staff of GIS Analysts and Research Analysts by assigning day-to-day activities, providing long-term department planning, setting data standards, and coordinating with the administration and outside agencies.

Northrop Grumman (February 2010 – February 2013)

Slidell, Louisiana

Job Title: Feature Data Production Manager

Supervisors: Sean O'Brien, Program Manager

- Designed, analyzed and developed geo-spatial solutions and product specifications for infrastructure, hydrographic and physiographic features for global geo-spatial images and vector products.
- Managed a staff of GIS analysts in the completion of feature data projects, a duty that included project scheduling and setup, staff training, presentation with upper management and on-time project delivery.

Dominion – East Ohio Gas (October 2008 – February 2010)

Akron, Ohio

Job Title: GIS Technician

Supervisor: Michael Jones, Technical Specialist

- Manipulated, digitized, and finished GIS data to maintain the company's digital pipeline infrastructure.
- Coordinated mapping duties with peers to collectively work on various pipeline projects.

City of Slidell (August 2007 – August 2008)

Slidell, Louisiana

Job Title: GIS Analyst

Supervisor: Ian Beer, GIS Manager

- Performed advanced processing functions using established Geographic Information System commands and software.
- Created spatial overlays and composed plots in support of city projects by combining information from a variety of existing data layers and utilizing program languages.
- Trained support staff in the use of computer software, including Microsoft Office products and the GIS software platform.

Intergraph Services Company (June 2006 – August 2007)

Huntsville, Alabama

Job Title: Cartographer

Supervisor: Tammy Hull, Hardcopy Nautical Production Manager

- Used cartographic skills to digitally finish various topographic and hydrographic hardcopy maps and charts for printing.
- Performed data translations and GIS functions to support country-wide geodatabases.
